OBJECTIVE

Software Engineering student with strong knowledge of C++ and JavaScript. Eager to apply skills and learn through real-world projects and collaborative environments.

EDUCATION

Bachelor of Science in Software Engineering

Expected 2028

Ghulam Ishaq Khan Institute of Engineering Sciences and Technology (GIKI), Topi

SKILLS

Programming Languages: C++, JavaScript

Web Technologies: HTML, CSS, Next.js, React

Databases: PostgreSQL, Prisma ORM

Concepts: Object-Oriented Programming (OOP), Data Structures and Algorithms (DSA)

Tools & Technologies: Git/GitHub, Cloudinary, NextAuth.js, Vercel, Tailwind CSS

Soft Skills: Problem Solving, Teamwork, Willingness to Learn

PROJECTS

PinBoard – Full-Stack Visual Pin Sharing Platform ([GitHub](#) | [Live Demo](#)) *Next.js, PostgreSQL, Prisma, NextAuth.js, Cloudinary, Tailwind CSS*

- Built a Pinterest-inspired full-stack web app where users can upload image pins, create boards, like & comment on posts, and discover content by category or keyword.
- Implemented multi-provider authentication using NextAuth.js v4 — Google OAuth, GitHub OAuth, and credentials (username + bcrypt-hashed password).
- Designed a relational PostgreSQL database with 6 entities (User, Pin, Board, BoardPin, Like, Comment) managed via Prisma ORM hosted on Neon.
- Built a REST API using Next.js Route Handlers with server-side session validation via getSession to prevent unauthorized access.
- Integrated Cloudinary for cloud image storage and CDN delivery; deployed on Vercel with full App Router architecture support.

CryptX – Compression and Encryption Tool ([GitHub](#)) *C++*

- Built a file compression system using Huffman Coding achieving up to 30–40% size reduction on text files.
- Implemented XOR-based encryption/decryption supporting both file-level and text-level security.
- Designed operation history tracking using stack and linked list, enabling management of 100+ user actions per session.
- Collaborated in a 3-member team to deliver the project within one academic semester.

Personal Portfolio Website *HTML, CSS, JavaScript*

- Developed a responsive multi-section portfolio with 7+ sections (Hero, About, Skills, Projects, Certificates, Education, Contact) to showcase skills, projects, and certifications.
- Built and deployed on Vercel, featuring smooth navigation, mobile responsiveness, and an interactive contact form.
- Integrated JavaScript for real-time interactivity, animated transitions, and dynamic section rendering.

CERTIFICATIONS

- Python Programming Essentials — Rice University
- Object-Oriented Programming in C++: Functions — University of London
- Introduction to Front-End Development — Meta
- Generative AI: Prompt Engineering Basics — IBM
- Additional certifications available on: [Portfolio](#)
